Source: Town of Bourne Assessors Records for FY 2007

For Transects 1-7 a 20% low range and 40% high range building/lot coverage was used to estimate potential new commercial development; a 1 d.u. to 3,360 s.f. (12 d.u. per acre) was used to estimate residential development

For Transects 8-10 (core area) a 30% low range and 60% high range building/lot coverage was used to estimate potential new commercial development; a 1 d.u. to 2,420 s.f. (18 d.u. per acre) was used to estimate resident
